A. Climate Change Discussions:

- CC agriculture presentation - Laik will work on updating the presentation with sources and what needs to be simplified and Talk to Ms. Karen about giving the presentation (through video or in person?) to students at BHS next year
- Wastewater presentation - Do we want to use it next year?
  - Find someone to head the wastewater presentation(s), it could be the focus of one person - talk to the whole commission to see if anyone is interested
  - Introduce a simplified version to younger grades? - possibly intermediate schools
- Delegation of different youth climate change organizations, but what would our part be in that?
- Trying to introduce environmental science to younger grades at BHS so they know the opportunities in that pathway
